

SCHÜCO

Efficient fabrication and simple clip-on installation

The aluminium cover cap is fixed to the outside of the profile using simple clip-on technology and is particularly resistant to environmental influences.

The cover caps can be "butt-joined" or "mitred" at the corners.

SCHÜCO

First-class design options

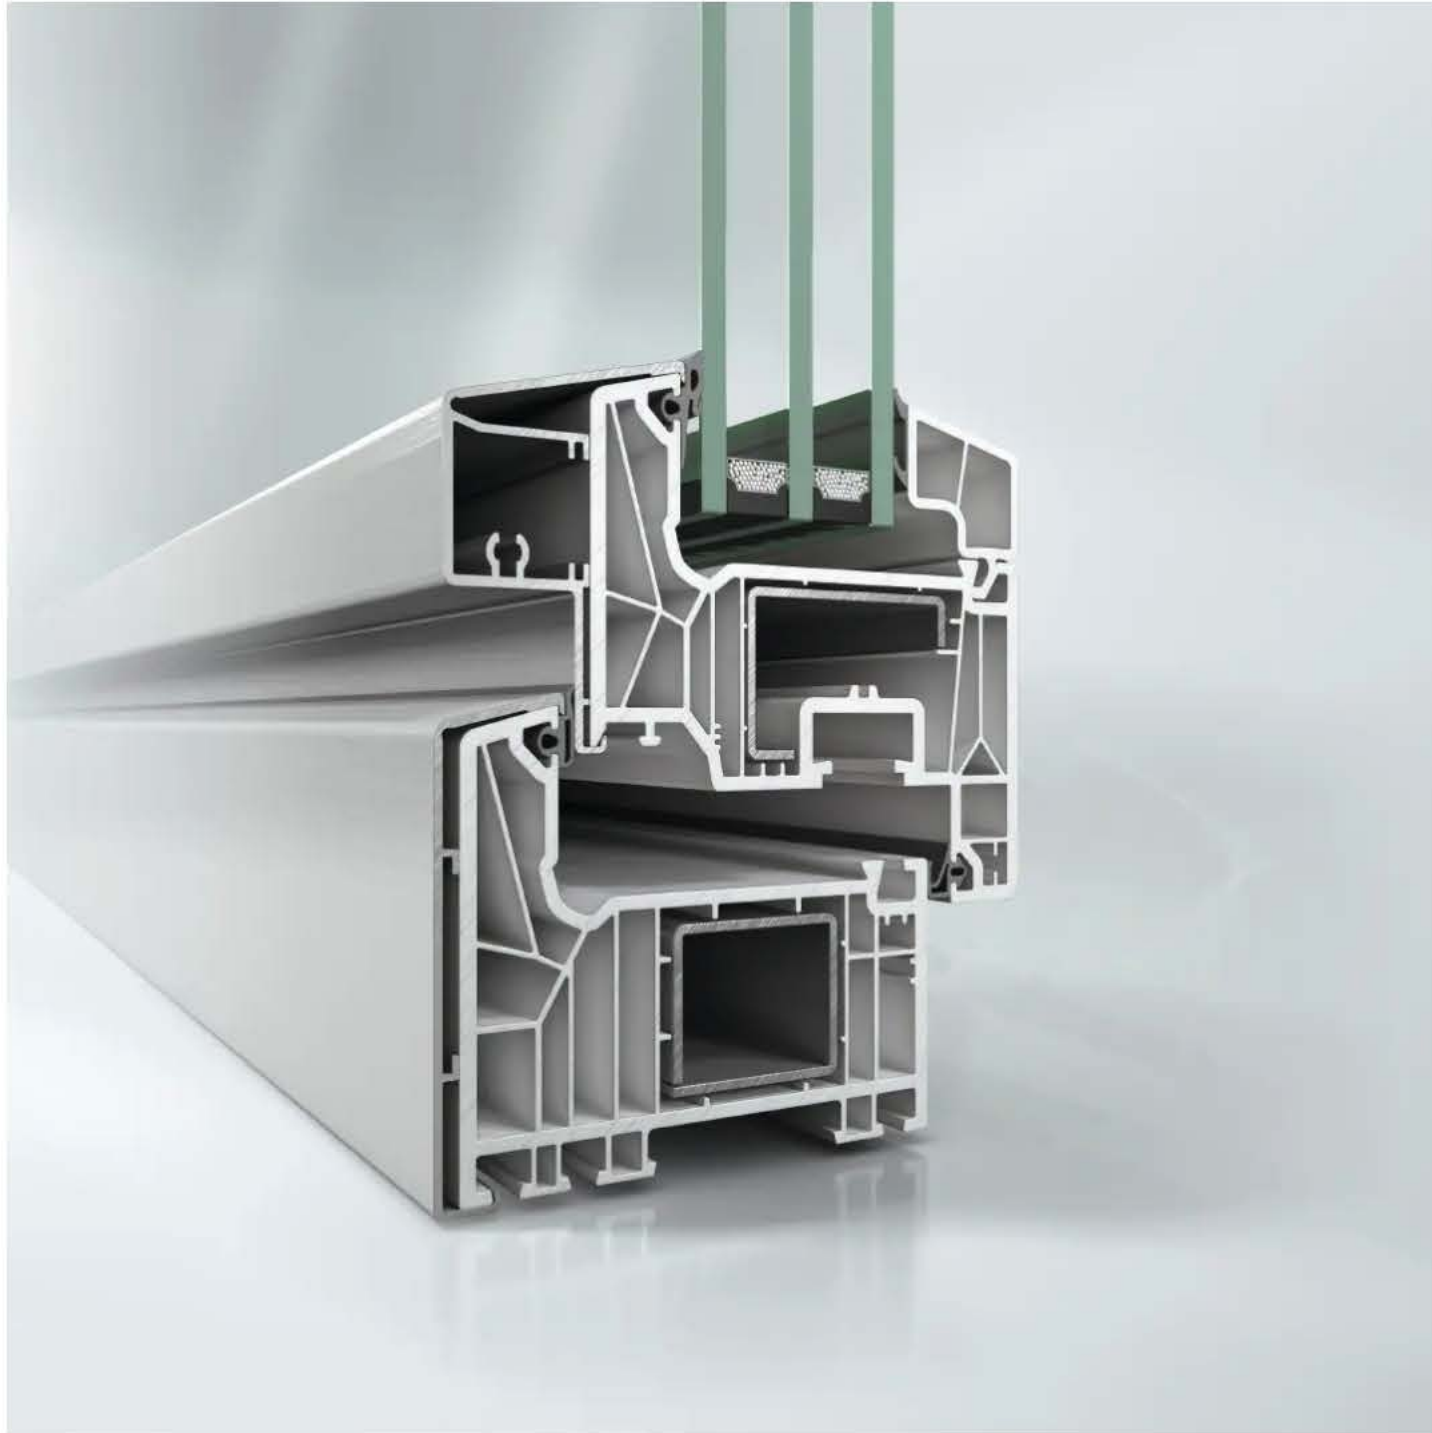

Externally mounted aluminium cover caps are an attractive design option for PVC-U window and door systems.

The timeless elegance of aluminium makes it the ideal material for modern architecture. The aluminium cover cap is fixed to the outside of the profile and can be coated or anodised in almost all colours.

Schüco TopAlu gives PVC-U windows a maximum service life and also offers first-class design options. There are virtually no limits to individual requirements.

Planning benefit

- High-quality external appearance with highly durable, coated aluminium surface finish
- Easy to clean the plastic surface on the inside
- High value retention
- All the benefits of modern PVC-U windows in terms of thermal insulation, weathertightness, maintenance and design are combined with the excellent properties of the aluminium surface and first-class design freedom
- Allows the perfect integration of PVC-U units in aluminium façades
- Colour variation between outer frame and vent frame possible

Exclusive contour cover caps

The variety of designs available for Schüco Living PVC-U system has been extended to include three new aluminium cover cap contours for vent profiles, which each create an individual look:

- Classic
- Rondo
- Pure

PVC-U window with external aluminium cover cap

Externally mounted aluminium cover caps are an attractive design option for PVC-U window and door systems.

The Schüco TopAlu aluminium cover cap system combines the excellent thermal insulation, weathertightness and low maintenance of PVC-U units with the particularly high-quality, diverse look and high level of resistance of aluminium surfaces. The timeless elegance of aluminium makes it the ideal material for modern architecture. The aluminium cover cap is fixed to the outside of the profile using simple clip-on technology and can be coated or anodised in almost all colours. Another benefit is that the material is particularly resistant to environmental influences.

Schüco TopAlu gives PVC-U windows a maximum service life and also offers first-class design options. There are virtually no limits to individual requirements.
