

## Custom Design

### Custom Design

Every project is unique. KASSO Engineering offers project-based solutions by working with architects, engineers and designers at every stage from design to installation to turn each individual idea into reality.

The design development process of one of the remarkable examples of "Custom Design", Vakko İstinye Park Facade and Interior Architecture Project, from the rendering to the realization is shared on this page.

Vakko İstinye Park, designed by one of the "Top 10 Fashion Architects in the World" French architects Pierre Beucler and Jean-Christophe Poggioli, who also undertake the architectural design of Vakko Zorlu, includes all the details required for a comfortable shopping while the design reflects Vakko quality and elegance stands out. The interior design of Vakko İstinye Park draws attention with marble, marquetry parquet, and brass decoration. It also makes itself more noticeable with the magnificent 3-dimensional exterior equipped with hidden lighting.
